USSR RAIL LINE SEARCH FOR ICBM ACTIVITY

This report presents the results of a search for ICBM activity along rail lines in the USSR

Eight previous reports gave the results of earlier rail searches from Missions

and explained the standards used 1/, 2/, 3/, 4/, 5/, 6/, 7/, and 8/. These reports had graphic supplements consisting of overlays keyed to World Aeronautical Charts (WACs) which showed the rail lines searched with negative results and indicated the location of all ICBM launch complexes identified to date. The applicable

Mission and pass number on which

the rail lines were covered were indicated on the overlays.

A total of 37 WAC overlays were required to indicate the information derived from a search and are included in the Graphics Supplement to this report.* The total length of Soviet rail lines searched on this mission for ICBM activity with negative results in accordance with established criteria is 18,040 nautical miles.

*Copies of the Graphic Supplement have been forwarded to the CIA requester and to the Control Officers of the Army, Navy, Air Force, DIA, and NSA. Further reproduction and dissemination of these overlays to subordinate commands will be the responsibility of these agencies.
